

FOR IMMEDIATE RELEASE

**Patni *iCAPA*™ Solution for Life Sciences Certified as
Powered by SAP NetWeaver®**

***Solution Allows Customers to Improve Corrective and Preventive Action Processes
Through Interoperability with SAP® Solutions***

ORLANDO, Fla. – May 12, 2009 -- [Patni Computer Systems](#) (BSE: PATNI COMPUT, NSE: PATNI, NYSE: PTI), a leading global IT and BPO services provider, today announced that its *iCAPA*™ Solution 2.0 for Life Sciences has achieved SAP certification as powered by the SAP NetWeaver® technology platform. The solution has been proven to integrate with SAP® solutions, providing customers with access to a Corrective and Preventive Action (CAPA) platform to meet regulatory compliance requirements for Quality Systems and drive new levels of product quality and operational efficiency.

The SAP Integration and Certification Center has certified that the Patni *iCAPA*™ Solution meets all criteria of a certified packaged composite application. It has been developed on the SAP NetWeaver Composition Environment (SAP NetWeaver CE) offering using the SAP NetWeaver toolset for composite application development. *iCAPA*™ exchanges critical data with instances of SAP Business Suite software. Patni has also demonstrated that the Patni *iCAPA*™ Solution integrates successfully with the SAP NetWeaver Portal.

“Customers are looking for solutions that help them meet their regulatory requirements while continuously improving organizational effectiveness,” said **Jim Macdonell, Vice-President and Head of Solutions and Delivery, Patni Life Sciences**. “The Patni *iCAPA*™ solution allows our clients to accomplish these objectives while enabling them to build or integrate their quality management systems in conjunction with SAP solutions,” he added.

As a result of the certified integration, *iCAPA*™ now provides Life Sciences organizations improved control and improved quality through better visibility into non-conformances during day-to-day operations. Patni’s *iCAPA*™ Solution provides an SAP solution-based framework for a company’s quality management system. Non-SAP technologies can integrate with the quality monitoring and reporting capabilities within *iCAPA*™ Solution. Executive management, operations management and quality management each have appropriate visibility into the Quality System. The solution’s compliance-driven matrix, project risk-mitigation capabilities and fast-track implementation template allow customers to realize significant improvements in their quality processes with minimal financial burden and a quick return on investment.

Today’s announcement was made at SAPHIRE® 2009 Orlando, being held here May 11-14, where Patni is exhibiting in Booth #949.
